

VIC | VEHICLE INNOVATION CENTER

Our mission. To be North America's leader in the exploration and advancement of bus and coach technology connecting people to places.

NFI's Vehicle Innovation Center (VIC) is the first innovation lab in North America dedicated to the advancement of bus and coach technology.

The VIC leads America in the exploration and innovation of bus and coach technology and provides essential workforce development through electric bus training, now available online. Through ongoing delivery of interactive experiences and collaboration with industry leaders, the VIC's mission is to:

Advance bus and coach technology through sustainable research and development, fresh innovation, progressive manufacturing, and bold thinking.

Generate energy and commitment to clean air quality, safety, and economic benefits for people, communities, and business.

Foster dialogue through discussion, education, and training on the latest zero-emission, connected and autonomous driving vehicle technologies.

Harness the positive influence of collaboration, environmental stewardship, and social change to advance smart mobility solutions.

Engage learning through current and interactive exhibits, simulation and hands-on experiences, and observations.

Driving innovation.

Development of the VIC was supported by New Flyer and Motor Coach Industries (MCI), each contributing interactive learning experiences that highlight the company's electric and automated vehicle technologies.

5,000

Industry leaders have attended VIC training and learned from our experts.

300

Hosted 300+ events and training sessions since 2017.

**50
Years**

Experience manufacturing zero-emission buses.

More than 65 million EV miles of experience.

Discover everything you want to know about electric and automated vehicles at the Vehicle Innovation Center.

Customized Training

Join us for customized virtual training tailored to your needs. Our industry experts will walk you through product demonstrations, deliver training on the latest technology, and conduct interactive Q&A sessions. These free one-day sessions are designed to equip you on your journey to zero-emission mobility.

ZEB Technology Training

You are invited to the industry's first fully comprehensive digital learning series dedicated to advancing zero-emission adoption. These free, four-part sessions are designed to provide workforce development, discuss the latest topics in the industry and provide an opportunity to ask industry experts questions in real time.

New Product Training

Join our virtual sessions dedicated to workforce development and training on the latest technology from NFI. Learn more on the systems and technologies behind our latest products from industry experts through interactive discussions and Q&As.

Don't just own the latest technology.

Get ahead of the curve and understand how it works in time for your next zero-emission procurement. Book your next training or tailored workforce development session at the VIC.
